Greetings,

Pat is on a well-deserved vacation this week so I am sending Advisory Committee meeting information.

The MPCA will be holding the next Wild Rice Standards Study Advisory Committee meeting on Thursday, August 8, 2013 from 12:30-3:30 p.m. at the agency's Duluth Regional Office in Canal Park (525 Lake Avenue S., Suite 400). Please see below for a link with a map, parking and driving directions.

An agenda is attached for the meeting as well as a map of planned field monitoring locations. Below is an ftp link for the sulfate hydroponic and mesocosm QAPPs. Nearly all signatures have been secured for the QAPPs but a few are missing due to vacations and will be filled in shortly. Eventually the QAPPs will be moved to our web site but that will take a few extra days.

For those of you planning to participate via telephone, please see below for the call in number and conference code.

We look forward to meeting with you in Duluth.
